

## Home Learning

### Minibeast Hunts

Go for a minibeast hunt with your child and see what you can find!

The children are enjoying digging in the mud outside and are finding lots of worms - we will be learning about minibeasts and other creatures that we find in the garden. We will also talk about growing and will use language such as longer than and shorter than.

### Counting Games

Numbers are everywhere - encourage your child to look for them when they are out and about - on doors, on buses, on street signs and cars.

This term our challenge is for the children to practice how to hold a pair of scissors correctly - this is a really important skill and one that you can really help with at home. Please see the attached sheet for ways that you can help.

### Nursery Rhymes & simple signs

Last term, we learnt some simple Makaton signs to go with some nursery rhymes that we sing. So far we have learnt:

- Old Macdonald has a Farm
- Baa baa black sheep

<http://www.bbc.co.uk/cbeebies/watch/something-special-nursery-rhyme-compilation>

Mr Tumble has some great ideas and simple signs for you to explore.

Please fill in the attached house shapes and let us know some of the activities that your child does at home this term so that we can add them to their 'My Unique Story' books.
