

## Science at Home

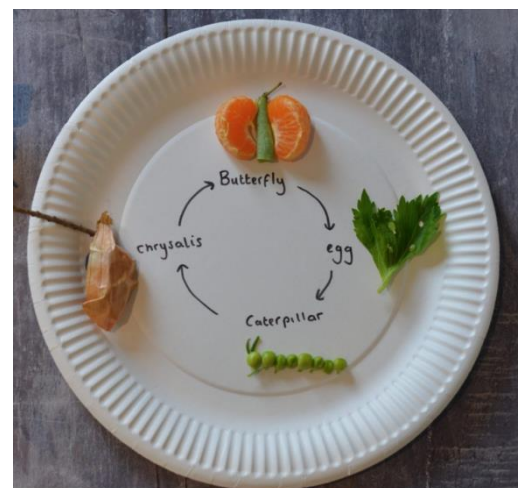

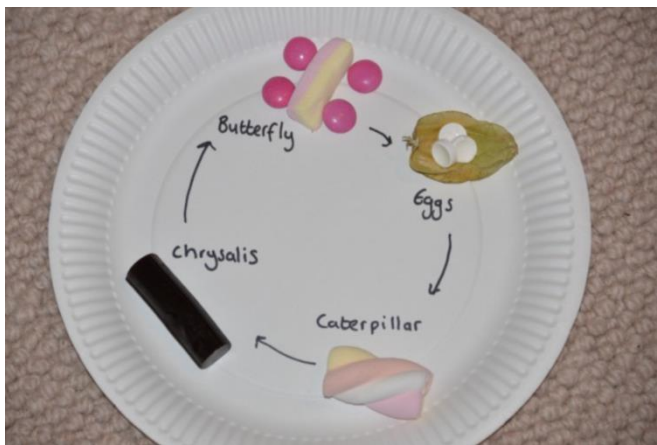

Following on from our fantastic Science Week, I would love you to continue to explore Science in your own homes. If you complete any of the activities at home, please share with us by contacting your Leader of Learning using the email on the school website.

Mrs Walker  
Science Lead

Here are some fun ideas:

### Minibeasts Life Cycle

- Research the life cycle of a butterfly. Using edible items, create an edible lifecycle. Place the items in the correct order on a paper plate or piece of paper and add arrows to show the direction of change. Can you then write an explanation?

Can you create an edible life cycle for a frog or an ant?
