

## Year 5 Home Learning – Week Beginning 4<sup>th</sup> May 2020

Hello Year 5,

Thank you for sending us all your wonderful learning. We have really enjoyed hearing from you and seeing photos of everything you have been doing. It is especially pleasing to see so many of you enjoying activities with your families. Keep it up! We have created a new schedule for learning this week. Don't forget about BBC Bitesize and the Oak National Academy for extra lessons.

Maths week beginning 27/04/2020

- Lesson 1 Multiply 2-digits (area model)
- Lesson 2 Multiply 4-digits by 2-digits
- Lesson 3 Divide with remainders
- Lesson 4 Calculate perimeters - remember the shapes are not to scale so measuring them won't help. To find the perimeter of a rectangle or square you have to add the lengths of all the four sides together. Remember if it's a composite shape or compound shape you must add all the sides and some of those lengths will need to be calculated first.

### English

This week in English we are going to focus on VE Day and the celebration of its 75<sup>th</sup> anniversary on Friday 8<sup>th</sup> May. Alongside this learning, you will complete some activities about 'After the War', a brand new story by Tom Palmer

- Lesson 1: Reading about VE Day
- Lesson 2: Response to pictures
- Lesson 3: After the War - predictions
- Lesson 4: After the War - reading comprehension
- Lesson 5: After the War - poetry

Please continue to use Spelling Frame to practise, and practise the year 5 spelling words, they are in your home learning book.

### Topic - River Deep, Mountain High

This term our topic is River Deep, Mountain High and thinking of where in the World would we like to travel and why. We will locate the world's countries, concentrating on their environmental regions, key physical and human characteristics, and major cities. This week we are focussing on Volcanoes.

- Challenge 1 – Locate a range of volcanoes from around the world. Colour code them on the map, or sketch a map of the world and plot famous volcanoes on it. There is a template you could use if you want.
- Challenge 2 – Label the features of a volcano
- Challenge 3- Can you film/take photos showing the volcanic eruption process, in a creative way. Maybe you can act it out? Create a video on iMovie (or a similar app)? Take photos showing how a volcano erupts? Draw a cartoon strip Be creative!
- Challenge 4 – build a volcano! Any way you want. Mrs Hudson has given it a go and given you some ideas. You could build it out of bottles, cardboard, plaster of Paris, dough, Lego, Duplo.the possibilities are endless.
- Challenge 5 – Party Planning time! Can you plan a VE day party? Maybe you could make some decorations and send us the pictures?!

**Have fun with your learning and remember we expect the same quality of learning and presentation for home learning as school learning. We look forward to seeing a copy of a piece of your learning this week – send us any pictures, so we can display them on Padlet!**

**Mrs Waters, Mrs Ferreira and Mrs Hudson**
