

Transition - Keeping In Touch

Music

Your Task!

On the Chrome Music Lab, <https://musiclab.chromeexperiments.com> please explore the following things:

- **Rhythm** - create your own rhythms by clicking on the dots at the bottom of the screen and pressing the play button. You can change the animals playing the instruments (and the different sounds they make) by pushing the arrow on the right
- **Spectogram** - discover the different sound properties different instruments have by clicking on the buttons at the bottom. With the microphone button (on the left) you can also see, and record your voice!
- **Songmaker** - Can you write your own melody (tune) by clicking on the different squares?

If you are pleased with what you have done, click "save" and email the recording (with a copy&paste) to Miss Jones at m.jones@invicta.viat.org.uk
