sketching and shading

Art-sketching and shading

What has been our topic this term?

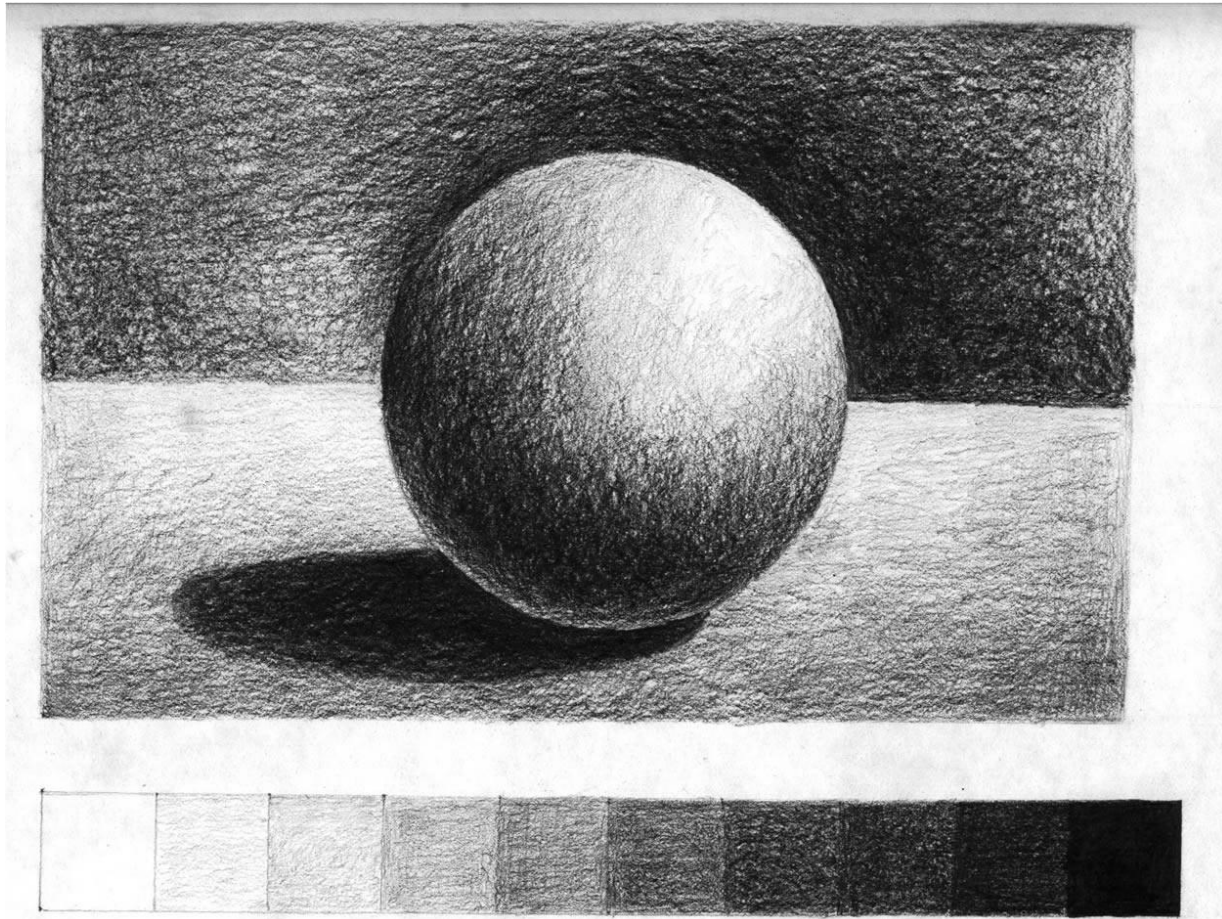

Today we are going to use our sketching skills to draw different shapes.

(Remember drawing is all about looking carefully and copying what shapes you see.)

Once we have drawn the shape we are going to use a torch to create a shadow of the shape.

Then we are going to use our shading skills to shade the shadow.

Drawing Shadows

Art-sketching and shading

Draw one shape at a time.

First draw the shape's outline.

Then use the torch to create a shadow.

After that use the side of your pencil to shade in the shadow.
