Independent Learning 2...

Match the correct name and description for each **Biome**.

Cut out the pictures and write or stick the name and description.

Rainforest

Savannah

Desert

Tundra

Hot and dry - very few animals and plants can survive here. Usually near the equator.

Warm and wet – it rains most of the time and lots of plants and animals live here.

Very cold – animals and plants have to be very tough to survive the freezing conditions.

Warm and dry – this area is mostly grassland with few trees and bushes.
