

Multiplication and division

Use what you know!

A multiple is a number that can be divided by another number, without a remainder. It is the product of two factors.

For example, 9 is a multiple of 3.

The 4th multiple of 6 is the same as $4 \times 6 = 24$.

Circle the correct answer each time.

1. What is the third multiple of 8?

16 20 24 30

2. What is the sixth multiple of 2?

2 5 12 20

3. What is the ninth multiple of 7?

54 63 67 79

4. Tick the calculation that you would do to find the 5th multiple of 25?

Add the 5th multiple of 10 to the 5th multiple of 5.

Add the 5th multiple of 20 to the 5th multiple of 5.

Add the 5th multiple of 15 to the 5th multiple of 5.

5. What is 560 divided by 7?

80 90 10 70

6. What is 210 divided by 3?

90 80 70 18

7. What is 810 divided by 9?

100 90 110 80
