SPEED TABLES

WALT

WALT plot coordinates on the 1st quadrant.

- ✓ I know what a quadrant is.
- ✓ I can use the x and y axis to plot coordinates.
- ✓ I can find missing coordinates.

1) Where is the origin on the graph?

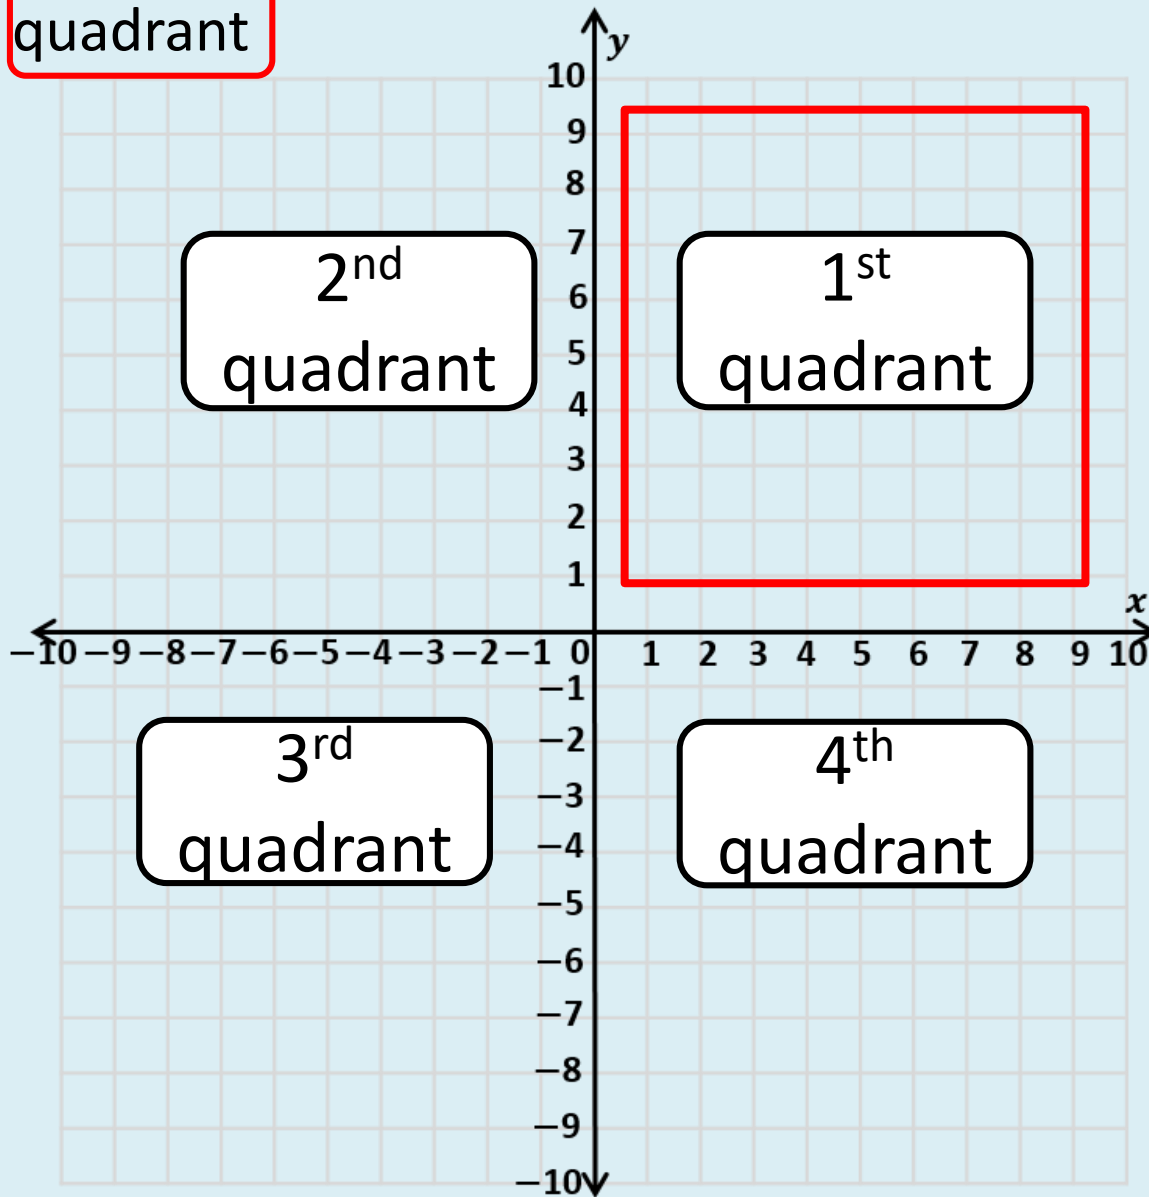

2) Where are the x - and y -axis on the graph?

3) Which number represents the y -coordinate in the coordinate pair $(5, 7)$?

7

The first quadrant

Increasing on
the y -axis

Increasing on
the x -axis

Decreasing
on the y -axis

Decreasing
on the x -axis

How can we describe the position of point \times ?

$\times (2, 4)$

The position on the x-axis

The position on the y-axis

Have a think

\times (2 , 4)

\times (4 , 2)

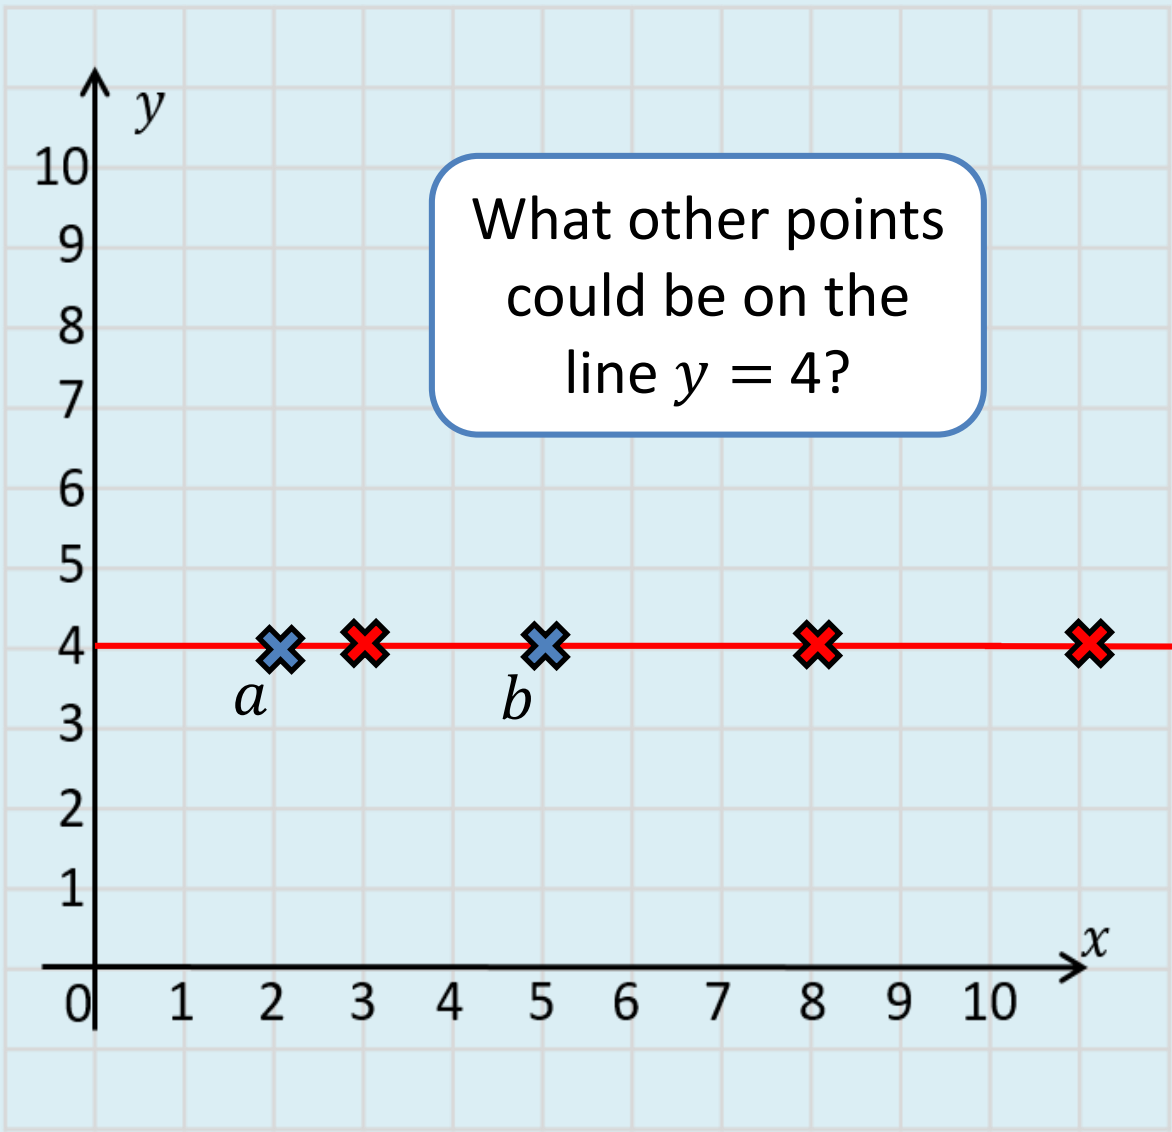

\times (5 , 7)

\times (0 , 6)

\times (9 , 0)

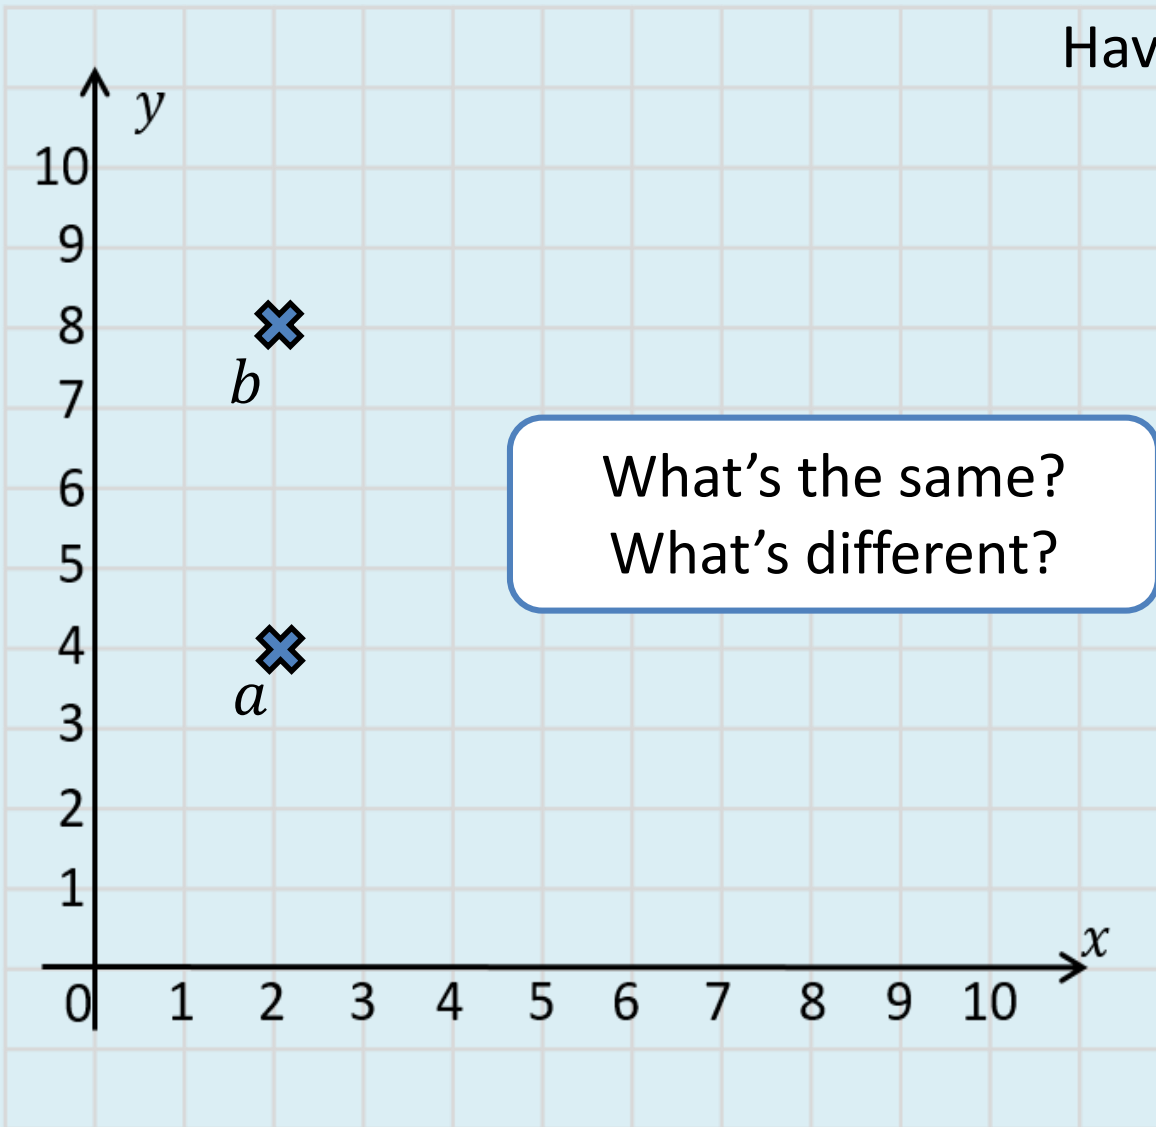

Have a think

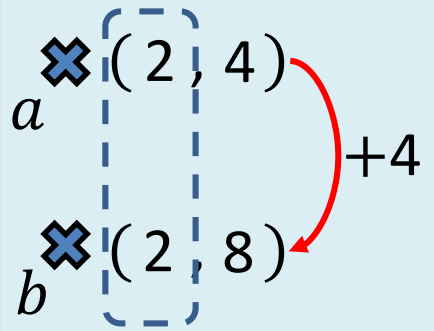

What other points could be on the line $y = 4$?

a \times (2 , 4)
 b \times (5 , 4)

Have a think

What's the same?
What's different?

Have a go at the
questions on the
worksheet...
