

WALT

WALT explore our new topic

- ✓ I can talk about what I already know.
- ✓ I can talk about what I want to find out.
- ✓ I can ask questions.

Circulatory System

Circulatory System

The circulatory system is one of the most important systems in the body. Made up of the heart, blood and blood vessels, the circulatory system is your body's delivery system.

It delivers nutrients, water, and oxygen to your billions of body cells and carries away wastes such as carbon dioxide that body cells produce.

Do all animals and humans have a circulatory system? What do you think?
