

Maths

WALT

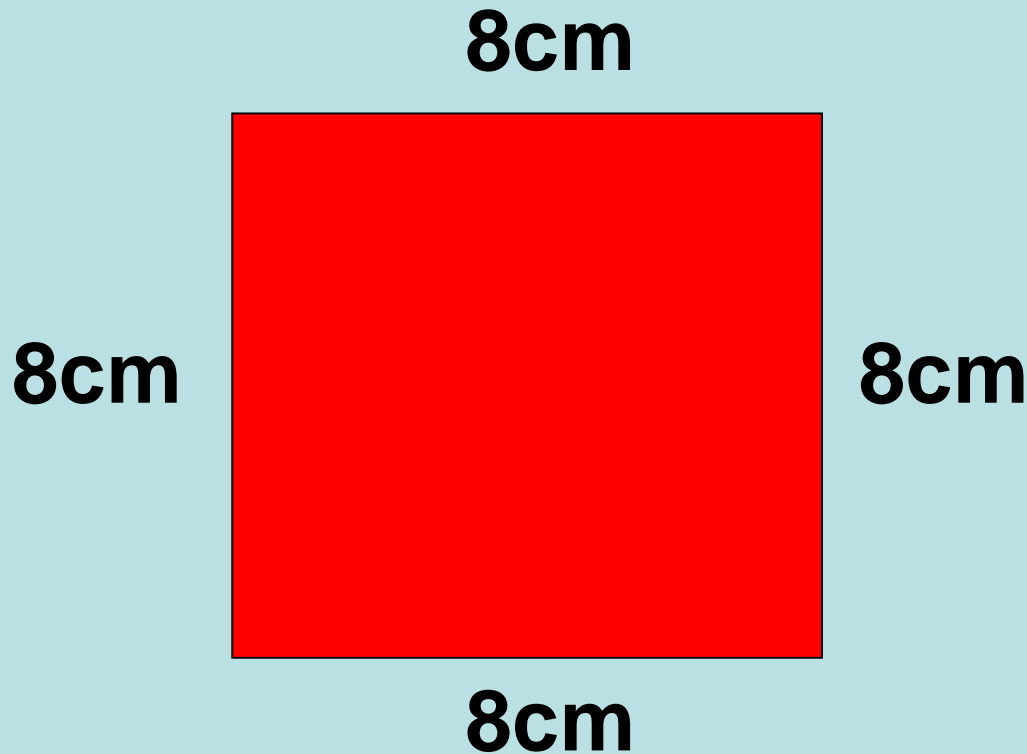

WALT draw shapes
I can:

- understand what perimeter is.
- use a ruler correctly.
- use a protractor correctly.

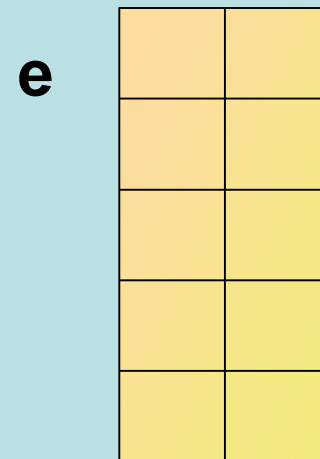

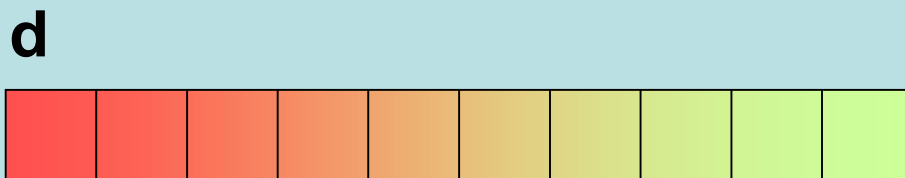

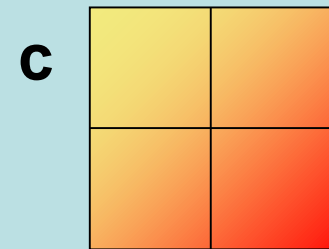

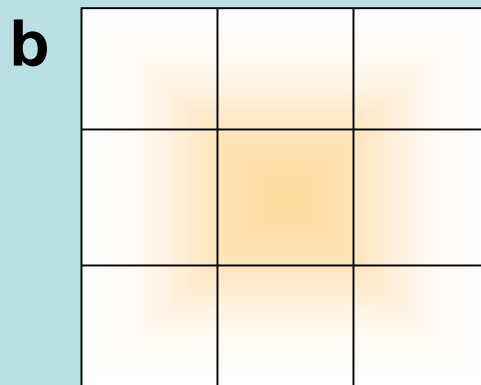

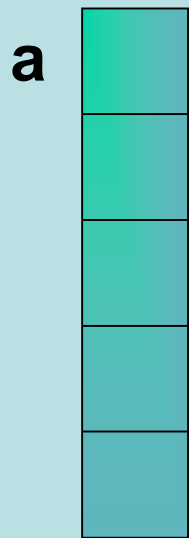

To find the perimeter we need to add all the measurements from around the outside.

$$8\text{cm} + 8\text{cm} + 8\text{cm} + 8\text{cm} = 32\text{cm}$$

Write down the perimeter for each shape. Which shapes have the same perimeter?

How to use a protractor
