What is the capital city of Egypt?

What climate zone is Egypt in?

Name the river that flows through Egypt.

Africa is huge! One billion people live here, in big modern cities, and small villages. There are 54 countries in Africa altogether.

On this continent, you'll find wet, steamy rainforests, tropical islands and hot, dry deserts. There are high mountains too, with snowy peaks, and great stretches of grassland, where animals roam free. You can see the world's longest river in Africa, and famous sights like the Pyramids. There are lots of delicious African dishes too: have you ever tried couscous – or plantain or biltong?
