

WALT

WALT find area and perimeter.

I can:

- ✓ use a formula to find the area.
- ✓ find areas of rectilinear shapes.
- ✓ find the perimeter of rectilinear shapes.

GET READY

- 1) Work out the perimeter of the shapes.
Each square represents 1 cm^2

2) $2a + 2b = 20$

Find the value of b if $a = 8$

3) $8 \times \square = 72$

- 1) Work out the perimeter of the shapes.
Each square represents 1 cm^2

- 2) $2a + 2b = 20$ Find the value of b if $a = 8$

$$2 \times 8 \quad 16 + 2b = 20 \quad 2b = 4 \quad b = 2$$

3) $8 \times \square = 72$

LET'S LEARN

Perimeter

$$5 + 2 + 2 + 2 + 7 + 4 = 22 \text{ cm}$$

The area of the small square is 1 cm^2

This square is made out of 4 of the smaller squares.

It has an area of 4 cm^2

What is the area of the rectangle?

The area of the rectangle is 24 cm²

The formula for the area of a rectangle

Length \times Width

$$6 \text{ cm} \times 4 \text{ cm} = 24 \text{ cm}^2$$

You can't work out the perimeter, you need to know all the lengths.

You can!

Have a think 

$$6 = 4 + ?$$

$$6 + 3 + 4 + 2 + 2 + 5 = 22 \text{ cm}$$

Find the area of this
rectilinear shape.

$2\text{ cm} \times 2\text{ cm} = 4\text{ cm}^2$ How many different ways

$3\text{ cm} \times 8\text{ cm} = 24\text{ cm}^2$ could you do it?

$4\text{ cm}^2 + 24\text{ cm}^2 = 28\text{ cm}^2$

Have a think 

Find the area of this
rectilinear shape.

$$2 \text{ cm} \times 2 \text{ cm} = 4 \text{ cm}^2$$

$$3 \text{ cm} \times 6 \text{ cm} = 18 \text{ cm}^2$$

$$4 \text{ cm}^2 + 18 \text{ cm}^2 = 22 \text{ cm}^2$$

$$2 \text{ cm} \times 5 \text{ cm} = 10 \text{ cm}^2$$

$$3 \text{ cm} \times 6 \text{ cm} = 18 \text{ cm}^2$$

$$10 \text{ cm}^2 + 18 \text{ cm}^2 = 28 \text{ cm}^2$$

Find the area of this
rectilinear shape.

$$2 \text{ cm} \times 2 \text{ cm} = 4 \text{ cm}^2$$

8 cm

$$2 \text{ cm} \times 5 \text{ cm} = 10 \text{ cm}^2$$

$$3 \text{ cm} \times 8 \text{ cm} = 24 \text{ cm}^2$$

$$3 \text{ cm} \times 6 \text{ cm} = 18 \text{ cm}^2$$

$$4 \text{ cm}^2 + 24 \text{ cm}^2 = 28 \text{ cm}^2$$

$$10 \text{ cm}^2 + 18 \text{ cm}^2 = 28 \text{ cm}^2$$

$$8 \text{ cm} \times 5 \text{ cm} = 40 \text{ cm}^2$$

$$2 \text{ cm} \times 6 \text{ cm} = 12 \text{ cm}^2$$

$$40 \text{ cm}^2 - 12 \text{ cm}^2 = 28 \text{ cm}^2$$

Area = 28 cm^2

Perimeter =

Area =

Perimeter = 26 cm

$$16 + 2w = 26$$

$$2w = 10$$

Have a think

Each square represents 1 cm^2

Area = 4 cm^2

Perimeter = 10 cm

Area = 5 cm^2

Perimeter = 10 cm

Area = 5 cm^2

Perimeter = 12 cm

Have a think

If you increase the area, the perimeter will also increase.
