

Term 4

History

Week 1

Session 1

Our new topic is

Rock 'n 'Roll

History

Stone Age to Iron Age

<https://www.youtube.com/watch?v=UL7beNWNLEQ>

- Now that was fun but was do you believe was historically wrong about it?

Discuss

WALTT arrange events from the past in
chronological order

S2S

I can

use the terms BC and AC appropriately

use historical language to describe the past

sequence using a time line

- The Stone Age is the name given to **the earliest period of human culture when stone tools were first used**. In Britain, the Stone Age was **around 12,000 years ago**.

All dates are approximates!

Timelines, are often used in history to put things in order of when they happened

- We arrange our dates from the time Jesus was born:
- even though we say this is the Year 20XX, the world is actually billions of years old
- BC means Before Christ and AD means Anno Domini (in the time of our Lord)
- Higher BC number were longer ago
- Higher AD numbers are closer to now

http://www.bbc.co.uk/history/british/timeline/neolithic_timeline_noflash.shtml

- This is a useful link but long winded – might help us grown ups – use as you wish

<https://study.com/academy/lesson/tools-weapons-of-the-neolithic-age.html>

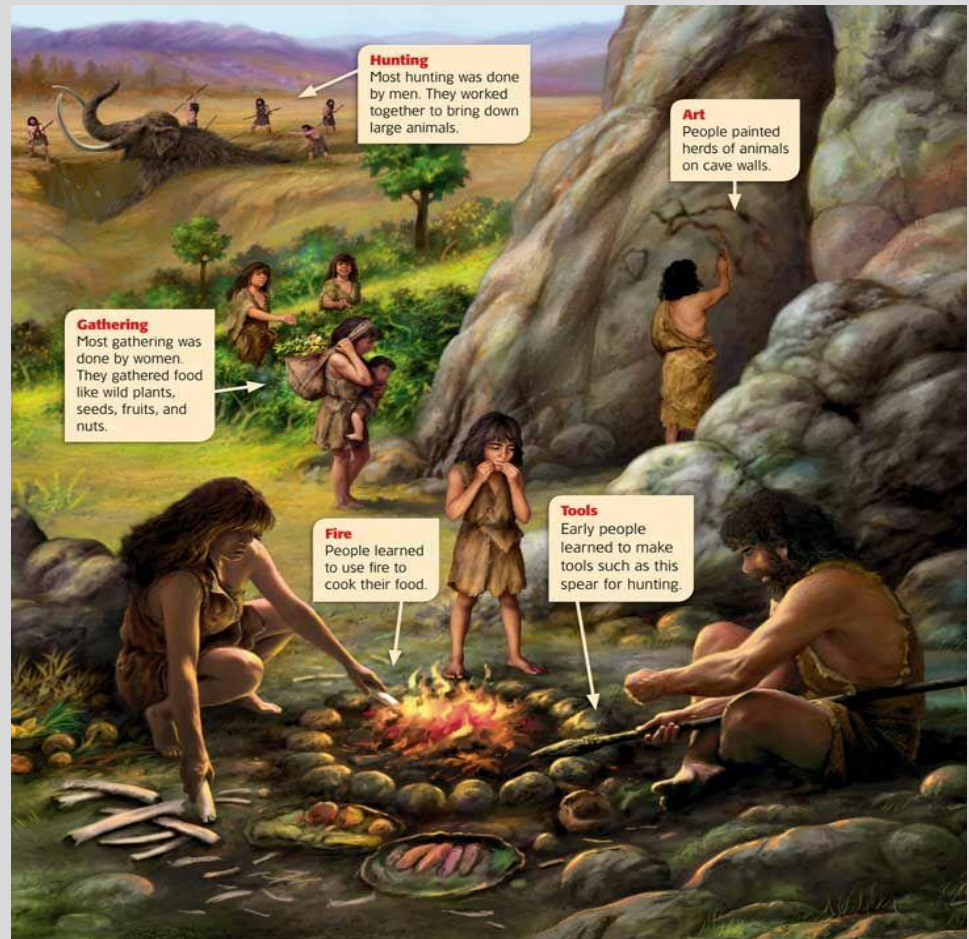

You will only get the beginning as this is free but it is useful and worth using with your child .

Around 450,000 BC

Palaeolithic (Old Stone Age)

People lived in caves

They were hunter gatherers

Around 25,000 BC

The Ice Age

Huge ice sheets covered the land and sea

Around 12,000 BC

- The ice Age ended

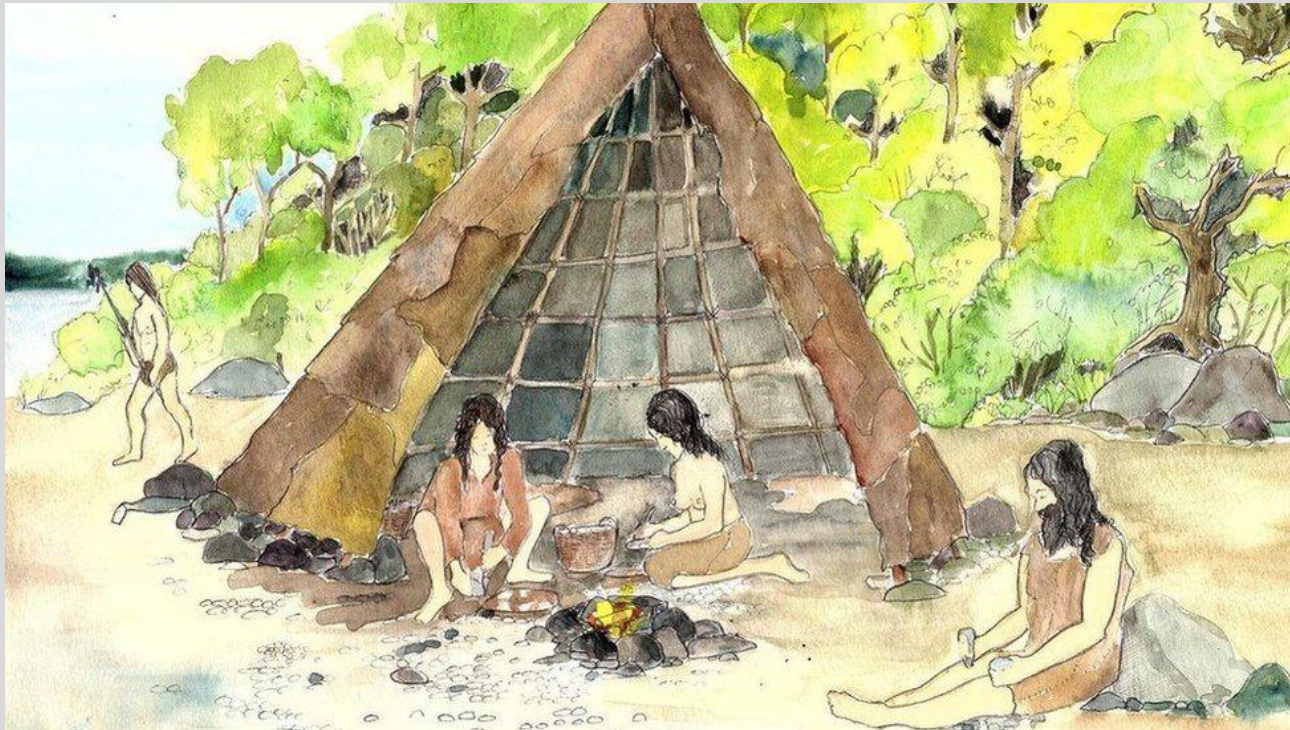

Large animals died out and smaller animals and plants began to grow in an area in the Middle East known as Mesopotamia, part of the Fertile Crescent.

Around 8,000 BC

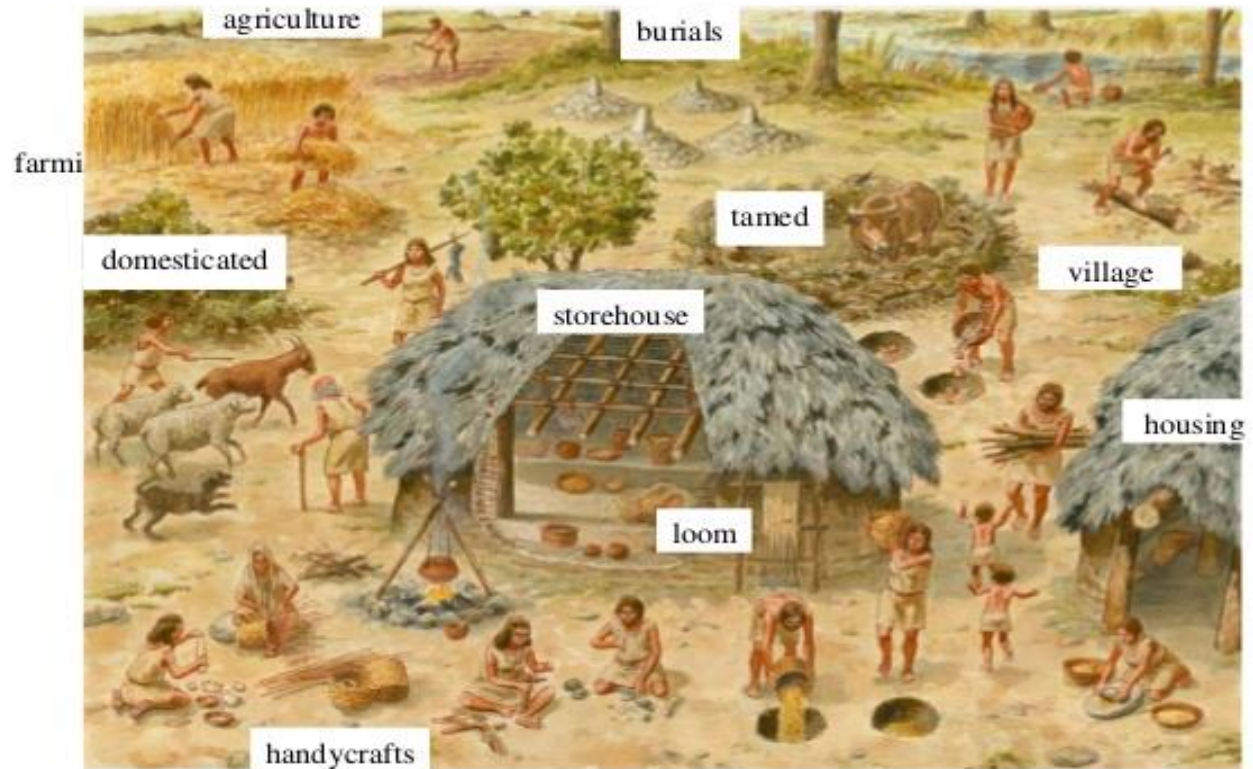

Mesolithic (Middle Stone Age)

People were still hunter gathers but had better tools

Around 4,000 BC

Neolithic Age / New Stone Age

Neolithic
(New Stone Age)

Was the final stage of cultural evolution or technological development among prehistoric humans. ... The **Neolithic** followed the **Palaeolithic** Period, or **age** of chipped-**stone** tools, and preceded the **Bronze Age**, or early period of metal tools.

From around 4,000 BC to 2,500 BC

- Pots made of clay
- Sharper tools made of flints
- House build of clay, dung and straw
- Fences made of wood
- Boats
- Lived in settlements

Your turn

1. Sequenced the images and definitions from your resource sheet and stick in the correct order to create a Stone Age timeline.
2. Write a question you would like answered for each of the time periods indicated on your timeline.
3. Write a definition of the terms BC and AD.
