

VOLUME OF A CUBOID

WALT

WALT find the volume of cuboids

I can:

- ✓ understand the formula for finding volume.
- ✓ use the formula to find volumes of cuboids.
- ✓ use my reasoning skills about volume.

GET READY

If the volume of each cube is 1 cm^3 , what is the volume of each shape?

If the volume of each cube is 1 cm^3 , what is the volume of each shape?

12 cm^3

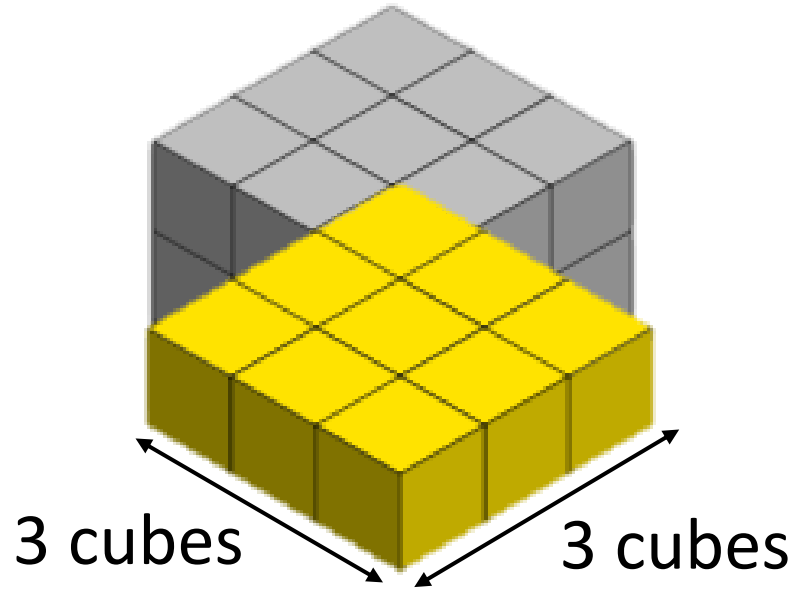

24 cm^3

30 cm^3

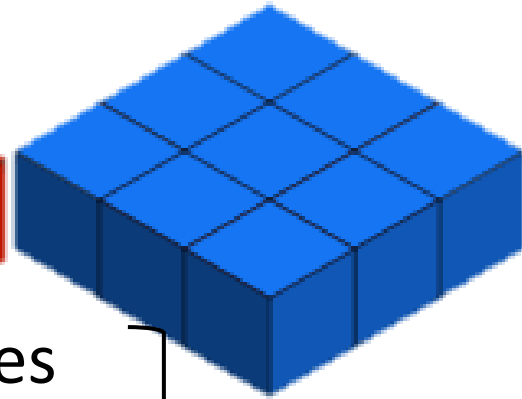

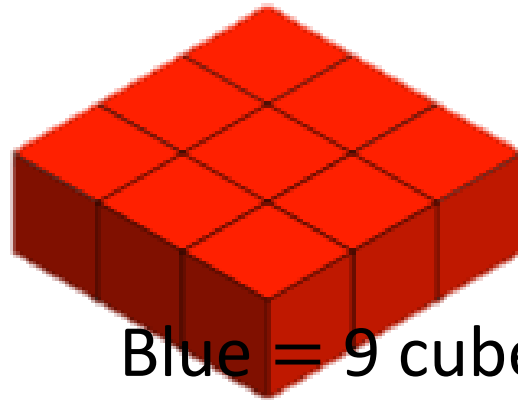

LET'S LEARN

$$3 \times 3 = 9 \text{ cubes}$$

Have a think

Blue = 9 cubes

Red = 9 cubes

Yellow = 9 cubes

$$9 \times 3$$

27 cubes

What does the 9 represent?

What does the 3 represent?

27 cubes

The **volume** of the cuboid is 27 cubes

Volume of a cuboid = **Length** \times **Width** \times **Height**

$$\begin{aligned}\text{Volume of a cuboid} &= \text{Length} \times \text{Width} \times \text{Height} \\ &= 5 \text{ cm} \times 3 \text{ cm} \times 2 \text{ cm} \\ &= 30 \text{ cm}^3\end{aligned}$$

Have a think

Volume of a cuboid = Length \times Width \times Height

Use the formula to calculate
the volume of the cuboids.

$$7 \times 3 \times 5 = 105 \text{ m}^3$$

$$4 \times 2 \times 10 = 80 \text{ mm}^3$$

YOUR TURN

Have a go at questions
1 - 4 on the worksheet

Who do you agree with?
What mistake has been made?

Have a think

The volume is $1,500 \text{ cm}^3$

The volume is $150,000 \text{ cm}^3$

Who do you agree with?
What mistake has been made?

The volume is $1,500\text{ cm}^3$

$$1 \times 20 \times 75$$

The volume is $150,000\text{ cm}^3$

$$100 \times 20 \times 75$$

If a cuboid has a volume of 20 cm^3 , what could the length, width and height be?

Volume of a cuboid = Length \times Width \times Height

$$1 \times 4 \times 5 = 20 \text{ cm}^3$$

Have a think

If a cuboid has a volume of 20 cm^3 , what could the length, width and height be?

$$L \times W \times H = 20 \text{ cm}^3$$

$$\boxed{1} \times \boxed{5} \times \boxed{4} = 20 \text{ cm}^3$$

$$\boxed{2} \times \boxed{2} \times \boxed{5} = 20 \text{ cm}^3$$

The shape is made up of two different size cuboids.
Calculate the total volume of the shape.

$$7 \times 3 \times 3$$

$$3 \times 3 \times 8$$

$$135 \text{ cm}^3$$
