

# Year 5 Geography – Lesson 2

Friday 5<sup>th</sup> March 2021

# Friday 5<sup>th</sup> March 2021

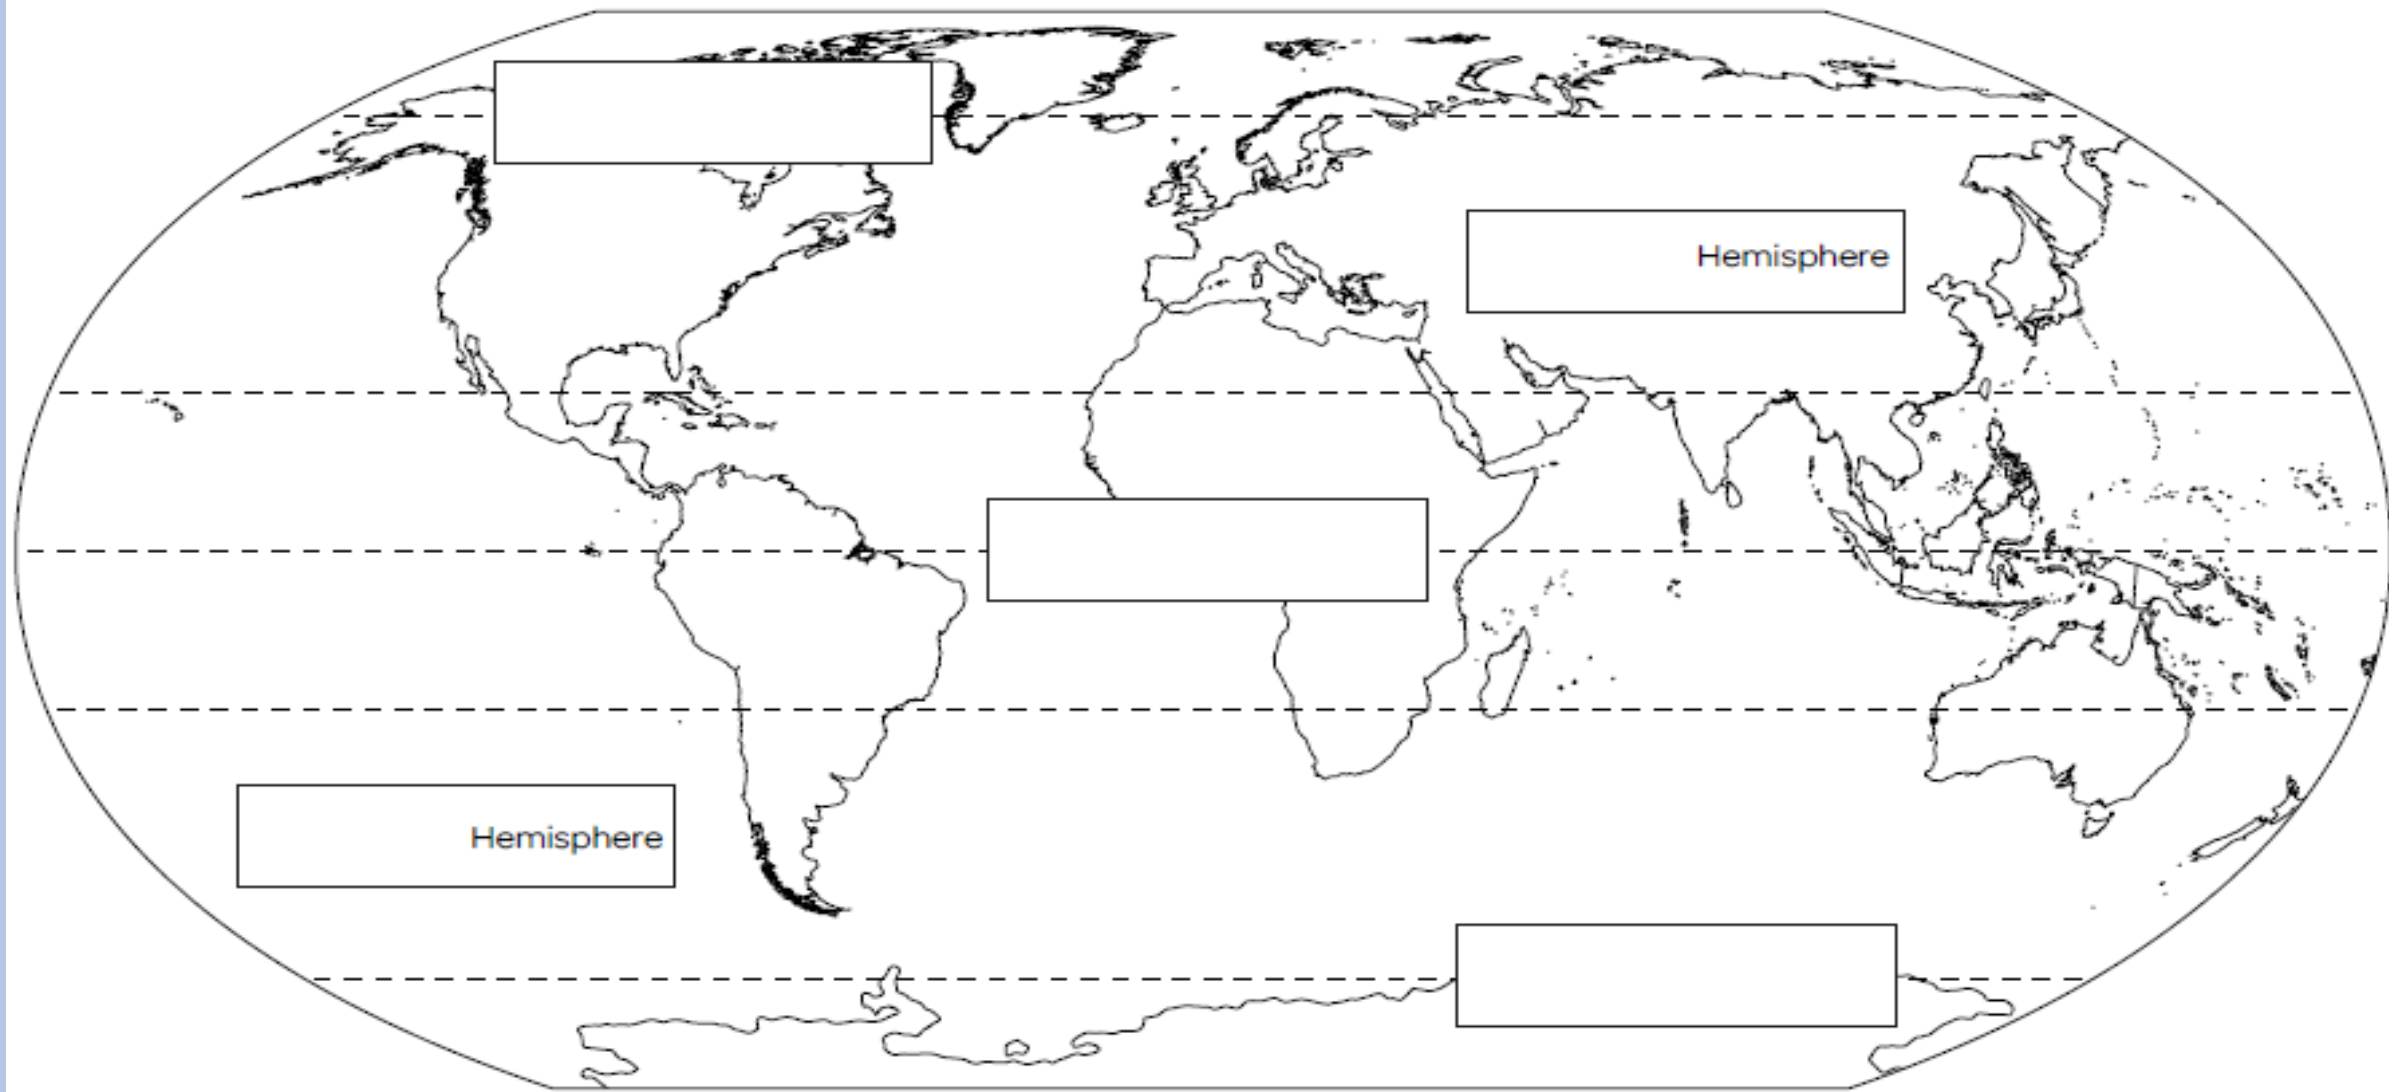

WALT label parts of the world

S2S: I can

- label the hemispheres
- label the seven continents of the world
- label countries and cities

Last week, we learnt about the equator. You may have labelled a world map with the countries that the equator goes through and researched these countries.

Label the map using the following vocabulary:

Equator

Northern Hemisphere

Southern Hemisphere

Arctic Circle

Antarctic Circle

# Today's tasks

Using the sheet/last slide...

- complete the boxes for the vocabulary at the bottom of the sheet
- use colours to shade the seven continents on the map
- create a key to show which colour is which continent
- research where (at least) two countries are in each continent (except Antarctica). Label where those countries are located and show their capital city too.

NB if you cannot print it out, make sure you know the seven continents of the world (point to the screen) and do the countries and cities research.
